

IB Maths AA SL Saturday Morning Revision Sessions

RESERVE A PLACE

BUILD SKILLS • IMPROVE STRATEGY • ACHIEVE YOUR BEST

These Saturday morning revision sessions are designed to help IB Maths AA SL students get more from past papers and, crucially, to develop the skills needed to approach them effectively.

We will focus on:

Understanding exactly what a question is asking and recognising key words and instructions.

Making connections between different topics and identifying which methods and techniques are required.

Developing a clear and efficient approach to answering questions.

Understanding what the IB examiners are looking for, particularly in terms of method and working.

Learning from common mistakes and misconceptions.

Developing calculator skills and shortcuts, which can make a significant difference in terms of both accuracy and time management during exams.

The aim is not simply to practise questions, but to help students become more confident and strategic in how they approach unfamiliar problems — an important skill for achieving their best possible result in the final exams.

WHEN & COST

**Saturday mornings
at 10:30am**

Each session lasts 50 minutes.

£100
for the first half term
(5 sessions).

DATES (FIRST HALF TERM)

19 September 2026

26 September 2026

3 October 2026

10 October 2026

24 October 2026

YOUR TUTOR

Richard Sleeman has been teaching Maths since 2009. He has worked in the UK in both the state and private sectors as well as teaching internationally in Portugal for 5 years. He is an experienced IB teacher, having previously led the IB Maths courses in a high achieving UK private school.
